

80 pixels height
60 pixels width

Pixel Paper - 400 x 400
Graph Paper for Screen Coordinates

Initial Idea

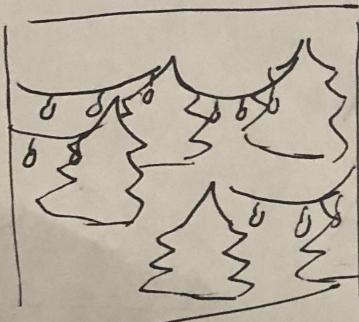

- holding a key
down makes lights
change colours

Arrays for star +
tree should be
separate?

Buncha trees at night with
some string lights??

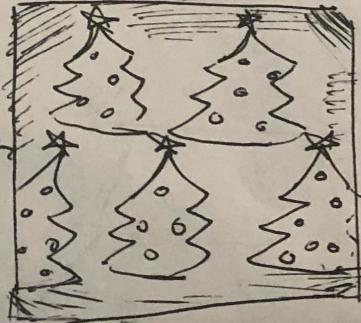

↳ make function to draw trees
with lights on them

→ maybe
Screen dims when
mouse at corner

↙ this would be
extra if I have
time

Dark blue background

there was issues with the stacked triangles and baubles
It's been changed to a single triangle and a star.

↳ Star will shine when space is pressed.
